

"Trust our family to look after your family"

HONEST DAY

Financial constraints and workload pressures in the NHS has resulted in high level of sickness and stress for our clinicians at York Medical Group. Our GPs have concern that they are not seeing patients in a safe environment and so to address this issue we have created an "Honest Day".

The Honest Day project has created a working day for GPs at York Medical Group which includes time for visiting, staff interruptions, refreshment and clinical admin as well as a manageable number of patient contacts.

The project goes live in June and we look forward to getting feedback from all our patients and staff about how it has been received.

Your feedback is important to us, both good and bad, so we can continue to improve our services to meet your needs. Please visit our website at www.yorkmedicalgroup.co.uk and click "Feedback and Suggestions" if you wish to give us feedback.
